

# Dr. Ben Cowin is Calling the Shots in Rio

All-Star Performance From the Terason uSmart® 3200T.

*“When it comes to Rugby  
I like working with the best.”*

– Dr. Benjamin R. Cowin (DC, MS,  
ATC, CAFS) Medical Provider for  
the World Rugby’s Referees

As a doctor who deals with soft tissue injuries in athletes, I’m under a great deal of pressure to return my patients to play as quickly as possible. It is important for me to not only have the correct diagnosis, but also to understand the severity of the diagnosis as quickly as possible. This is where diagnostic musculoskeletal ultrasound comes in. It gives me the tools to provide quick and accurate information so I can make the correct diagnosis immediately and set a care plan accordingly.

The Terason 3200T is the most portable out of all the machines I looked at, but that’s not the main reason I chose it. The main

reason I chose it was because of its clarity. I felt that the Terason 3200T gave me the best opportunity to have the clearest image, and therefore the best chance of seeing what I needed to see and give an accurate diagnosis quickly. The fact that I can drop it in my backpack and take it all over the world is bonus. This unit is one of the foundations of my sports medicine practice and I am truly thankful to be able to have such a great device at my disposal everywhere I go.

– Dr. Benjamin R. Cowin (DC, MS, ATC, CAFS)  
Medical Provider for the World Rugby’s Referees
